

Java - Full-stack crash course for Interview Prep - Notes

1. Introduction & basics of Java

I. Introduction & basics of java :

JAVA is General purpose prog language mainly used for CRUD operations. 1. Java OOPS + programming language 2. Java SE - Java Standard Edition - Project implementation feature (prev java used here like OOPS, RegEx, Swing, Socket, Threads, Spring, Collections) Application - It is mostly used for developing windows applications. 3. Java Web Application - Java EE (Enterprise Edition) - Spring, SpringBoot, JDBC, Hibernate, Microservices, etc (like Board Infinity). 4. static variable and static block in java are excluded for sure then flow goes to main block
